BACKGROUND

- Destination BC is monitoring British Columbian's current views on travel and tourism as well as tracking travel and tourism behaviour intentions in order to understand the impact of COVID-19 on the tourism industry.
- As such, Destination BC has commissioned Leger (formerly Insights West) to conduct a number of waves of research, one approximately every two weeks, starting May 13, 2020 to track opinions and intentions and watch how results trend over time. The survey moved to monthly fielding starting in January 2022.
- Note that some changes and additions were made to the questions in a couple of waves to continue to fully meet the research needs of the project.

METHODOLOGY

- Online survey with at least 800 British Columbian adults (1,000 starting November 26, 2021) via an omnibus (shared study).
- Data is weighted by a number of demographic variables to ensure it is representative of the province.

KEY HIGHLIGHTS – WHAT'S NEW OR CHANGED

TRAVEL INTENTIONS (SLIDES 6-10)

- As we approach the late Summer period, BC residents' short term (next 4 weeks) travel intent within BC increased for both day trips and overnight travel versus July – up +5 points for day trips and up +4 points for overnight. Medium term (within 2-3 months) travel intentions are also up, climbing +4 points for day trips and a directional +2 point increase for overnight trips. Compared to a year ago, travel intentions within BC for both day trips and overnight continue to be about -6 to -11 points lower for both short and medium term.
- Short and medium term intent for travel to other provinces are up directionally +2 points each. For the next 4 weeks and next 2-3 months, travel intentions to other parts of Canada continue to be similar to a year ago.
- Travel intentions to the U.S. are up directionally +2 points over both the short and medium term; both are significantly higher than in August 2021. While travel intentions are stable over the next 4 weeks to destinations in other countries, the next 2-3 months signify that travel is up significantly by +3 points from last month. For annual comparisons, short term travel is stable compared to last year to other countries, but has risen significantly for medium term intentions.

CONCERN WELCOMING VISITORS (SLIDES 11-13)

- BC residents' concern welcoming visitors from most markets is generally stable and remains close to record lows.

COMFORT WITH ACTIVITIES/MODES OF TRANSPORTATION (SLIDES 14-19)

- There continues to be no large changes in comfort with various activities, accommodation options, and transportation types. The only activity that has significantly jumped in comfort is cruise ships, which increased +6 points in August.
- Comfort levels with all activities are either close to or at record high levels.
